To Whom it May Concern:

I wish to voice my opposition to the draft M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

After 6 years of pain and mounting symptoms of endometriosis and hormone imbalance, I have been grateful to have found a provider who was familiar with the products of Madison Pharmacy Associates, through which I have been obtaining two prescription hormonal compounds which have helped in just a few months to alleviate symptoms that were interfering with my ability to function normally.

These natural compounds have been a God-send after years of dead-end treatments, including surgery. It has been my experience that the synthetic products offered by commercial pharmacies had an effect of easing my symptoms for a time, only to contribute to them later. Those products did not WORK for me, and only added to years of frustration. I am experiencing true relief with these products, with the bonus of knowing that there are no ill side-effects!

PLEASE protect our rights as Americans to have choices in health care alternatives, AND the rights of companies that have found a unique niche to thrive as they should in our free-market system.

Yours truly,

Lynda Dutzmann
